## **BUSINESS REVIEW**

The Group's services are broadly categorised into two main sectors: (i) asset advisory services and asset appraisal; and (ii) corporate services and consultancy.

Asset advisory services and asset appraisal are the core business of the Group, which typically involves provision of independent valuation services to a number of listed groups to meet market, regulatory and fiduciary requirements, sourcing and identifying potential investment opportunities or investors, undertaking due diligence and evaluation on the underlying assets and provision of procedural and strategic business advices.

Asset advisory services income is primarily success-based nature and is usually calculated based on a percentage of the value of the underlying asset or the consideration agreed between the parties in the underlying transaction, the decrease in such revenue for the nine months ended 31 December 2011 as compared to same period 2010 was mainly because of existing asset advisory services clients have become more cautious about their underlying projects owing to the uncertainty of global economy. Asset appraisal services income decreased in 2011 was mainly for the reason of dropping in mergers and acquisitions related appraisal engagements, which were primary brought by the lack of optimism in the global economy and the volatile financial and capital markets.

The corporate services and consultancy segment mainly focuses on provision of advice to corporations in areas such as corporate governance, internal control, enterprise risk management and other operational aspects as well as provision of back office administration. Owing to the growing client base, revenue generated from this segment amounted to approximately HK\$11.4 million in 2011, marking a remarkable increase of approximately 351% over the same period last year.

In August 2011, the Group successfully completed the acquisition of 20% equity interests of TodayIR Holdings Limited (“TodayIR”). Founded in 2005, TodayIR offers comprehensive online investor relations services. It has a client portfolio of over 230 listed companies and is one of the largest online investor relations platforms in Asia. The acquisition provided the Group with a good opportunity to expand its network for all its business activities, develop new market, achieve economy of scale and a wider range of services in its provision of corporate services business. The acquisition also gave the Group the ability to cross-sell corporate and investor relations services and to develop bundling opportunities for those services, which is line with the Group's strategy to establish itself as a one-stop professional services provider.

## **FINANCIAL REVIEW**

The Group's revenue for the nine months ended 31 December 2011 was approximately HK\$35.6 million (nine months ended 31 December 2010: approximately HK\$45.0 million), representing a decrease of approximately 21% from that of 2010. The decrease in the Group's revenue during the period was mainly attributable to decrease in asset advisory services.

The Group's cost of services for the nine months ended 31 December 2011 was approximately HK\$11.9 million (nine months ended 31 December 2010: approximately HK\$8.5 million), representing an increase of approximately 40% from that of 2010. The increase was mainly due to increase in direct labour cost.

The Group's marketing, administrative and other operating expenses for the nine months ended 31 December 2011 was approximately HK\$22.1 million (nine months ended 31 December 2010: approximately HK\$11.0 million), representing an increase of approximately 102% from that of 2010. The increase was mainly due to increase in administrative staff cost and rental expenses.

Accordingly, the profit attributable to owners of the Company for the nine months ended 31 December 2011 was approximately HK\$4.6 million (nine months ended 31 December 2010: approximately HK\$24.7 million), representing a decrease of approximately 81% from that of 2010.

## **PROSPECT**

The Group was listed on the GEM of The Stock Exchange on 31 May 2011. Since listing, the short term performance of the Group has been weakened by the uncertain global economy. Existing clients of our asset advisory services have become more cautious about their underlying projects owing to the uncertainty of global economy and therefore less corporate activities were being carried out as previously expected causing a substantial drop in our asset advisory services income. Nevertheless, the demand for professional services offered by the Group will continue to be there. In addition, benefitted by the demand for the purpose of annual financial statements reporting, the fourth quarter is usually the peak season of the asset appraisal services and it is expected a major increase in asset appraisal services income in the fourth quarter comparing that in third quarter. Income from the asset advisory services, however, is less certain and is dependent on the pace of recovery of the global economy, given that income can only be earned and recognized when the underlying transactions have been successfully completed.

With our existing competitive advantages and market position in our core business segments, the Group has continued to work on the implementation of its development strategy to strengthen its competitiveness and enhance its service capabilities. We are now better positioned to capture future business opportunities and are confident to deliver sustainable growth in returns to our shareholders once the global economy is stabilised.
